EXPERIENCE

Capgemini

Analyst/Software Engineer

Detail-oriented and results-driven Software Developer with 2 years of experience in .NET full-stack development, Agile methodologies, and Azure DevOps. Possessing a strong foundation in software engineering principles, I am committed to delivering high-quality solutions that meet client needs and exceed expectations.

Work History

Developed and maintained web applications using .NET technologies including C#, ASP.NET,.Net Core, MVC, and Entity Framework. Experience in Sql server and DB2 in backend technologies.

Collaborated with team members to design and implement new features and enhancements based on client requirements

Utilized Agile methodologies to plan and execute project sprints, participate in daily stand-ups, and conduct sprint retrospectives

Implemented continuous integration and continuous deployment pipelines using Azure DevOps to automate build, test, and deployment processes

Worked closely with QA team to identify and resolve bugs and ensure software quality

Participated in code reviews to maintain code quality and adherence to coding standards

Contributed to architectural discussions and provided technical guidance to junior team members
